

*Working in Southern Sudan is a huge challenge.
We know it is much bigger than we are.
You have helped in the past.
We need your help for this Kingdom work to be the
most it can be.*

Thank You

This will be our third trip into the war-torn countries of Africa in the last twelve months. We will be meeting the container which has the complete radio station. We must truck this equipment from Uganda into Sudan. The road travel alone will be daunting. The equipment will need to be set up. The people must be trained for the equipment to be put to use. God has raised up faithful workers over the years. We feel blessed to be working with those who are willing, conscience, and available.

You are a part of this project . . . *helping us, helping others!*
